

Add a Layer to Your MTSS Model

Classwide Intervention = Tier 1.5 (and It Works)

ES = .68 CBMs
 ES = .18 Gr 4
 ES = .79 for at-risk

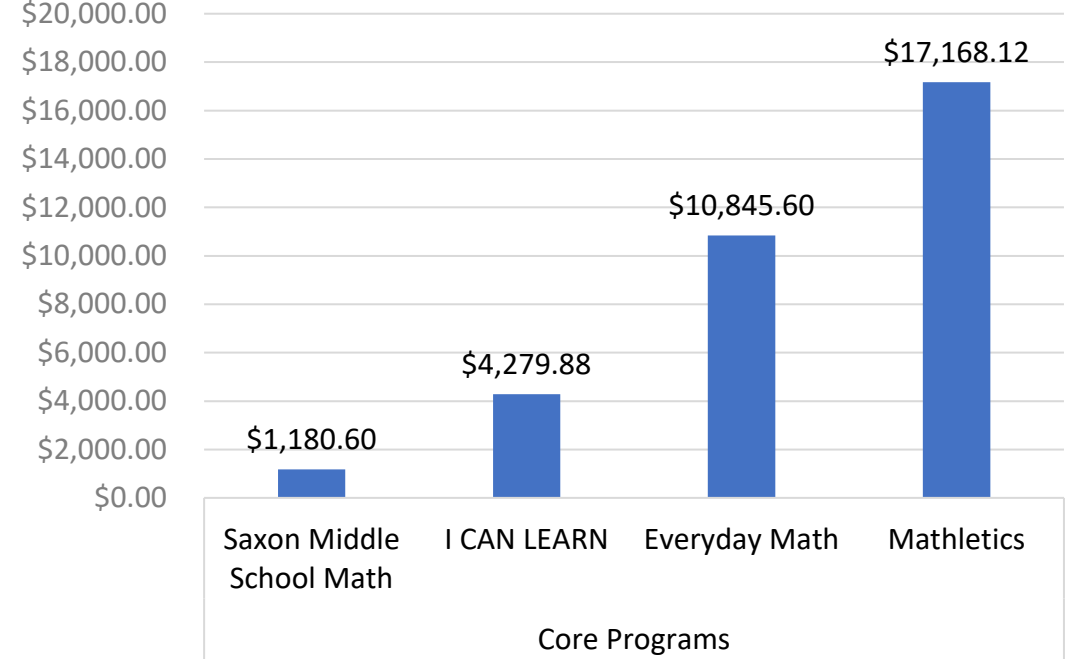

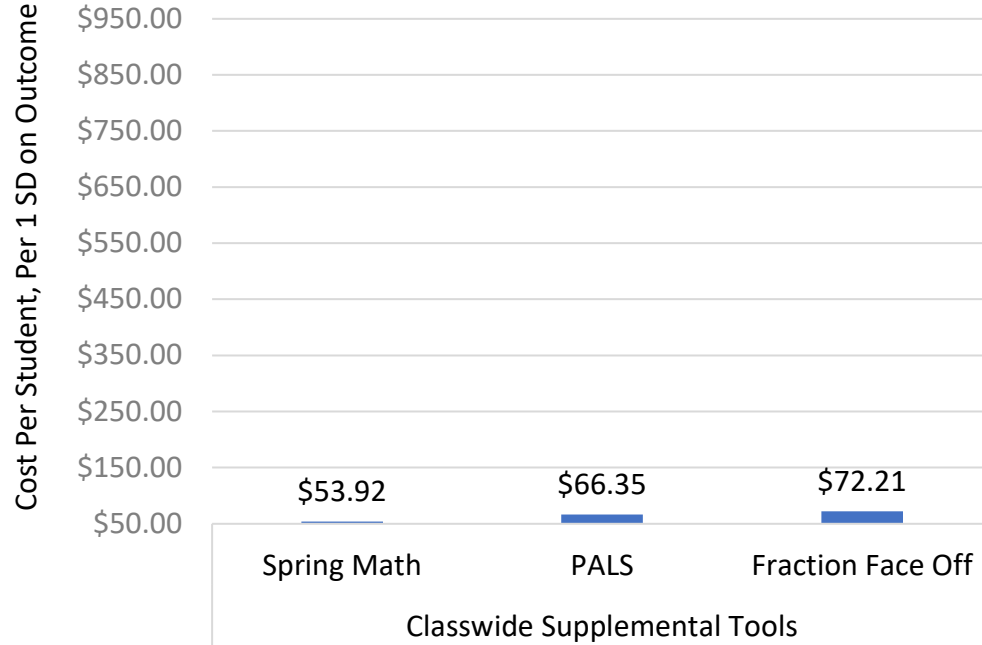

Classwide Intervention Gives You a Strong ROI

Cost Per Student, Per 1 SD gain in outcome

Incremental Cost Effectiveness Ratios

Lower is Better

“Changing math curricula as an approach for whole-school intervention when large numbers of students do not achieve proficiency is more costly than targeted, preventative math intervention” (Barrett & VanDerHeyden, 2020)
